

# Microsoft Defender for Cloud Apps POC

Remote 1-Day Workshop | 1.500 €

## Microsoft Defender for Cloud Apps as Cloud Access Security Broker

Microsoft Defender for Cloud Apps (MDCA) is a multimode Cloud Access Security Broker (CASB). It gives you rich visibility, enables you to control how your data travels, and provides sophisticated analytics to identify and combat cyber threats – across all of your cloud services. It helps you discover, protect and respond to threats.

### Have an overview about **MDCA** and its capabilities

- Security Overview
- E5 Security Framework
- Zero Trust

### Investigate your cloud apps and detect **shadow IT**

- Implementation
- Configuration
- Integrations & APIs

### Manage your **cloud apps** and detect threats

- Shadow IT
- Detect Threats with MDCA
- Manage Cloud Apps and Files
