

Microsoft Sentinel POC

Remote 3-Day Workshop | 4.500 €

Aggregate Your Data with Microsoft Sentinel

Microsoft Sentinel is a scalable, cloud-native, security information event management (SIEM) and security orchestration automated response (SOAR) solution. Microsoft Sentinel aggregates data from all sources, including users, applications, servers, and devices in any cloud or on-premises. It provides a single solution for alert detection, threat visibility, proactive hunting, and threat response.

Have an overview about the functions of Microsoft Sentinel

- Security Overview
- E5 Security Framework
- Zero Trust

Understand how to use Microsoft Sentinel and the infrastructure

- On-board Sentinel
- Connect Data sources
- Discover rule templates

Setup your Workspaces and connect your data sources

- Define Playbooks
- Detecting Threats
- Demonstrate remediation
